1900: an exploration of breaks between calendar years of publication. *Journal of Zoology*, London 266(4): 427-430.

Dickinson et al. (2011: 239-240) noted that despite the prior collations, the dates of publication up to 1859 remain problematic. It should also be noted that work now in progress demonstrates that some molluscan taxa, along with many other animal taxa, date from the separate serial, *Abstracts of the Proceedings of the Zoological Society of London*, which appeared from 1904 to 1936 (N. Evenhuis, in litt., 29 Dec. 2015). The molluscan taxa at least include eight species of *Chromodoris* by Eliot in 1904 and the genus *Taphrospira* by Blanford in 1904 [not 1905].

Revue et Magasin de Zoologie

Dickinson et al. (2011: 242) concluded that although a month-date was given for each issue, "it is recommended that every issue be dated the month following the 'specified date,' and later, of course, where there is evidence of delay."

E. C. Dickinson & A. Lebossé, 2017. A study of d'Orbigny's "*Voyage dans l'Amerique Meridionale*". II. On the composition of the 1837 and 1838 volumes of the *Magasin de Zoologie*. *Zoological*

Bibliography 5(2): 13-37. [They concluded that a substantial part of 1837 volume (vol. 6), including its only three papers containing molluscan species, two by d'Orbigny and one by Rang, was delayed and published in 1838; they dated this part as September 30, 1838. Similarly, the 1838 volume (volume 7) was issued in two years; two molluscan species by Petit and one by Deshayes in signature 3 are taken to be issued in late 1838. The nine molluscs of *La Favorite* by Eydoux in signature 20 appeared in 1839; they dated it as June 30, 1839.]

Revue Zoologique par la Société Cuvierenne (1838-1848)

Dickinson et al. (2011: 243-244) concluded that "it is recommended that every issue be dated the month following the specified date."

Zoological Miscellany [J. E. Gray, 1831-1844]

Mathews, 1920: 10.

A. G. Kluge, 1971. John Edward Gray and "The Zoological Miscellany." Pp. iii-iv, in: J. E. Gray's *The Zoological Miscellany* with an introduction by Arnold C. Kluge. Lawrence, Kansas: Society for the Study of Amphibians and Reptiles, viii + 86 pp.; frontispiece [portrait], 4 pls. [reprint of entire journal].

Dickinson et al. (2011: 199-200) note that although there are gathering dates indicating that pages 41-80 were issued in 1842, and pages 81-85 were issued in 1844, library records show that pages 1-40 were issued much earlier, in February 1831.

Collation of J. E. Gray, *Zoological Miscellany* (1831-1844) given in Annex 1 to this list.

Appendix D: Name Abbreviations in Older Malacological Literature

The following list are abbreviations found in the literature for the names of malacologists. These are compiled, in large part, from the lists of Anton (1839: xi), Jay (1839: 108-109; 1850: 431-459), Sismonda (1847), Carpenter (1863: 122-150), Abbott (1974: 14) and Boss (1988, 1999). The latter listed the pre-Linnaean authors cited by Linnaeus (and others).

Note that accents were frequently left off abbreviations.

In the older literature, some authors routinely used abbreviations when attributing authorship, but this practice has been abandoned in recent decades, partly due to the potential for confusion with authors who share the same or similar last names, and partly due to the needless difficulty in deciphering some abbreviations. Where there were several malacologists with the same last name it is now recommended, particularly with the authors of taxa, to indicate specifically which author is one meant, such as G. B. Sowerby II, etc.
